## Fact sheet number pyramids

The topmost block is called the target block.

Sum rule
$3+4=7$

The blocks in the bottom row are called foundation blocks.

Number pyramids can have different heights.
A pyramid of 3 is 3 blocks high.

A block that is centered on two other blocks is called a cap block.

The sum rule applies everywhere.

$2+3=5$

$3+1=4$
$5+4=9$
